BlueWare Joins EMC Velocity² Technology and ISV Partner Program

BlueWare Enhances Wellness Connection Utilizing EMC Documentum Content Management Technology

Cadillac, Michigan—January 22, 2008 – BlueWare, the providers of *Wellness Connection* Electronic Health Record, announced today that they have joined the EMC Velocity² Technology and ISV Partner Program. BlueWare develops and supports a family of software products, including the award-winning *Wellness Connection*, to provide on-line medical records for patients within hospital networks.

Joining the Velocity² Partner Program is the first step in building a relationship with EMC, the world leader of information infrastructure solutions. The agreement will give rise to a BlueWare and EMC® Documentum® integration to provide a best-of-breed Electronic Health Record solution.

With the healthcare industry's continuous focus on improving the patient experience while struggling with limited resources, digitising and leveraging consistent patient records safely can help achieve greater efficiencies and improve the patient experience and care. BlueWare understands these challenges and develops software with a patient-centric approach in mind—this is BlueWare's priority.

Libby Bucsi, EMC Director of Global Industry Group, Healthcare for EMC Documentum states, "BlueWare offers EMC a solution in which we can jointly present an Electronic Health Record solution for large population base for hospital environments. This is critical to meet the needs and requirements for a secure and patient-focused healthcare management solution with EMC Documentum as a document management foundation."

BlueWare's UKISA Business Development Executive, Sarah Greenwood, contributes, "This is a significant time for BlueWare. The integration of BlueWare's *Wellness Connection* with EMC's Documentum is the exciting first step towards *Wellness Connection* being a de facto standard for electronic document management in the health sector."

About BlueWare, Inc.

BlueWare is an international Strategic Healthware Solutions corporation located in Cadillac, Michigan. The development and marketing of software and hardware products specific to the healthcare industry is the major focus of our business. BlueWare develops and supports a family of software products, including the award-winning *Wellness Connection*, targeted at providing an on-line medical record for hospitals.

We employ a staff of highly skilled and certified professionals, teachers and healthcare leaders to perform in two distinctive areas, Industry Consulting and Product Specialization. Our associates are proficient in many healthcare related fields, and familiar with the issues of today's healthcare provider, distinguishing us as a solution provider for the healthcare industry.

BlueWare's cause is noble, through our products we are committed to improving the quality of life for the people in the communities we serve. We strive to address the challenges and develop products that take into consideration the concerns of healthcare providers; security, cost, installation time and training. We are committed to the integrity of our

service and to building relationships with our clients as they grow and prosper.

BlueWare currently partners with the Integrating Healthcare Enterprise (IHE) and the Electronic Health Records Vendors Association (EHRVA) to create interoperability between Electronic Health Records as we move to a RHIO based market.
