FOR IMMEDIATE RELEASE

BlueWare to Deliver Wellness Connection Version 5 with HP

Cadillac, MI— September 1, 2009—BlueWare announces that Version 5 of BlueWare's award-winning *Wellness Connection* Clinical Document Management software will run on the mission-critical HP Integrity server platform within the healthcare market.

Running *Wellness Connection* Version 5 on the HP Integrity platform will create new opportunities for *Wellness Connection* and will significantly lower the entry point cost for healthcare providers looking to deploy BlueWare's software. In addition, the HP Integrity platform enables Version 5 of *Wellness Connection* to offer high redundancy, greater stability and scalability and higher performance. "HP Integrity will allow for higher throughput at increased speeds in many situations," says Jyran Glucky, VP of Development at BlueWare.

Rose Harr, CEO and President of BlueWare, comments "This key collaboration with HP will allow BlueWare to deliver our revolutionizing electronic health record system to even more healthcare providers. Because of HP Integrity platform *Wellness Connection* Version 5 will become a more agile solution to deliver to the ever-changing marketplace".

"Customers in the healthcare industry require highly available electronic health records solutions that maximize return on investment," said Harry Kim, director, WW Health Management, HP. "HP Integrity servers empower healthcare organizations to help manage risks associated with sensitive healthcare records, while realizing significant cost savings."

About BlueWare, Inc.

BlueWare is an international software corporation dedicated to the healthcare industry. We develop and support a family of products that delivers a comprehensive electronic health record. BlueWare believes in a healthcare environment where information is accessible, accurate, and comprehensive. We devote our work to advancing a longitudinal electronic health record that interoperates with various systems to create the most complete record on the market. We believe that we can utilize each system within your facility to coordinate all patient information together into one user-friendly system, creating the all digital health record from "cradle to grave".
