

BlueWare's *Wellness Connection* Version 4.1 Release

Overview

Wellness Connection Version 4.1 provides all of the functionality of Version 4, yet offers new features and enhancements for customers in the area of usability, security, patient alerts, faxing, eSignature and chart completion. Some of the highlights of the **Wellness Connection Version 4.1** release are:

Usability Enhancements

- Addition of navigational icons allow for sign off and patient search from any screen
- Expanded use of "Twisty Icons" to more effectively use screen space
- In Document Display, the document currently being viewed is highlighted
- Fast-Path search directly from patient select screen
- Patient folder selection directly from census display
- Tab order preference changes have become more streamlined
- Add documents such as B-Forms and utilize 3rd party applications even when there are no documents stored for the patient

Security Enhancements

- Improved audit reports
- Optional and customizable Patient Alert symbols can be used when certain conditions apply
- Protect patient security by using only last four digits of SSN
- Indication message when patient is deceased

B-Forms Enhancements

- B-Forms administrative features available in the GUI
- Greater flexibility in managing groups and defined form types

eSignature Enhancements

- eSignature "Drag & Drop" signature assignment when multiple signatures required
- eSignature are highlighted for physician ease of use
- Delinquency warning flags in physician workbaskets

Chart Completion Enhancements

- Ability for analyst to add an ad-hoc deficiency to a patient's chart
- Greater flexibility for various types of chart notes for physicians and analysts
- View the progress of all deficiencies with the addition of a Physician Progress Workbasket
- Chart Location Audit Log
- Enhanced and additional HIM Administration Audit Reports
