

BlueWare's *Wellness Connection* Version 4.2 Release

Overview

Wellness Connection Version 4.2 provides all of the functionality of Version 4, yet offers new features and enhancements for customers in the areas of usability, security, B-Forms, eSignature, and more. Some of the highlights of the **Wellness Connection Version 4.2** release are:

Usability Enhancements

- User Alerts on Patient Search Screen—alert the user to items requiring their attention
- Document Display Tabs—Collapse and expand the tab field on the document display page
- Document Display Tabs—View all documents under one tab as a complete group with scrolling capabilities
- User sign-off options
- Service code provides diagnosis data to indicate correct department for that encounter
- Improved navigation of the administration areas allows users to navigate back and forth between maintenance functions

Security Enhancements

- Inactive user timeout—automatic sign out after a defined amount of time
- Audit trail includes actions taken on a deficiency
- View audit trail across a specified date range
- View audit trail based on specific users
- “Break-the-glass” feature extended to physician’s office staff

B-Forms Enhancements

- Enhanced organization of profiles and output queues
- Streamlined department maintenance features

eSignature Enhancements

- Ability to reject individual signatures or entire document in physician workbasket
- Ability to add a hand written signature deficiency

Chart Completion Enhancements

- Greater workflow around dictated documents

Miscellaneous Enhancements

- Supports RTF Document Display
- Automatic URL redirect
